

YOU ARE MAKING A DIFFERENCE For Girls and Women in Kenya

Karen and Carolyn are secondary students surrounded by Josephine, a MWEEP Kenya member and Esther, an English Teacher and first MWEEP University graduate.

Jane is studying Public Relations. Esther graduated from Kenyatta University and is a teacher. Juliette is a 3rd year Moi University student. These women are committed to bringing positive changes to their communities.

90% of every \$ donated directly supports school fees and tuition

Educated girls are marrying men of their own choosing. This family now owns two bookstores and hopes to build a Girls' Secondary School on their property.

A family was excited to bring their daughter to secondary school for her first term. She is the first child in their family to attend secondary school.

Most of these women have been a part of MWEEP Kenya since it was founded in 2005. They meet once a month and make the decisions about which girls receive cost/share help from MWEEP. They are valued community leaders and empowered women. With your help they are offering opportunities and giving hope for a better future to young Maasai women.
